Brainstorming & Idea Prioritisation

Online Complaint Registration and Management Systems — MERN
Stack E-commerce Application

Phase: Brainstorming & Ideation Phase

Document Version: 1.1

Date: 18th of June, 2026

Prepared by: BHAVINI SURI

Classification: Project Documentation — For Academic Submission

Brainstorming & Idea Prioritisation

1. Introduction

This document records the structured brainstorming and ideation process undertaken during the initial planning stage of the Online Complaint Registration and Management System (OCRMS). The objective of this phase was to identify challenges in traditional complaint handling systems, generate potential digital solutions, and systematically prioritise features using established ideation frameworks. The outcomes of this process provide the foundation for the Problem Statement Definition and Requirement Analysis phases.

2. Problem Statement Selection

Organizations and service providers often struggle with inefficient complaint management processes that rely on manual tracking, delayed responses, and lack of transparency. Users require a centralized, secure, and efficient platform for complaint submission, real-time tracking, automated complaint categorization, agent assignment, and effective communication throughout the complaint resolution lifecycle.

3. Idea Generation & Grouping

3.1 Raw Idea Listing

Idea ID	Idea Description	Category	Retained?
I-01	Build a full- stack MERN- based complaint management platform	Core Architecture	✓ Yes
I-02	Use E-mail based complaint management platform	Traditional systems	✗ Discarded – lacks tracking and automation
I-03	Use spreadsheet-based complaint records	Traditional systems	✗ Discarded – difficult to scale and manage
I-04	Implement JWT-based authentication and authorization	Security	✓ Yes
I-05	Enable online complaint registration with attachments	Complaint management	✓ Yes
I-06	Integrate real-time chat using Socket.io between users and agents	Communication	✓ Yes
I-07	Implement Role-Based Access Control (Admin, Agent, User)	Access Control	✓ Yes
I-08	Build analytics dashboard with complaint statistics and reports	Administration	✓ Yes

Idea ID	Idea Description	Category	Retained?
I-09	Implement AI-powered complaint classification and routing	Artificial Intelligence	✓ Yes
I-10	Complaint sentiment analysis for advanced insights	Advanced Features	● Future Scope
I-11	Mobile application support for complaint management	Platform Expansion	● Future Scope

3.2 Idea Grouping — Affinity Diagram

3.2 Idea Grouping — Affinity Diagram

4. Idea Prioritisation — MoSCoW Framework

Priority	Classification	Feature / Idea	Rationale
Must Have	Core — Release 1	User Registration & JWT Authentication	Required for secure access and user-specific operations
Must Have	Core — Release 1	Complaint registration & tracking	Primary functionality of the system
Must Have	Core — Release 1	Role-Based access control	Enables proper management for admins, agents, and users
Must Have	Core — Release 1	Complaint status management	Ensures efficient assignment of complaints
Must Have	Core — Release 1	Analytical dashboard	Essential for tracking resolution progress
Should Have	Release 1	Analytics Dashboard	Enables monitoring of complaint statistics and trends
Should Have	Release 1	Real-Time chat systems	Improves communication between users and agents

module

Measures service
quality and user
satisfaction

Priority	Classification	Feature / Idea	Rationale
Could Have	Release 2	Mobile application support	Improves accessibility and convenience
Could Have	Release 2	AI sentiment analysis	Provides advanced complaint insights and reporting

5. Conclusion

The brainstorming phase successfully transformed the project vision into a well-defined set of prioritised deliverables. The identified Must Have features form the Minimum Viable Product (MVP) scope for the initial development iterations. The accepted ideas directly support the functional requirements of the Online Complaint Registration and Management System and provide a strong foundation for subsequent design, implementation, and testing phases
