Classification: Project Documentation — For Academic Submission

Problem – Solution Fit

1. Introduction

This document formally validates the Problem–Solution Fit of the Online Complaint Registration and Management System (OCRMS). Fit is achieved when the proposed solution effectively addresses the key pain points experienced by complaint submitters and complaint resolution officers while delivering measurable improvements in transparency, efficiency, communication, and complaint resolution outcomes.

2. Customer Journey → Problem → Solution Mapping

3. Competitive Analysis :

Criterion	Manual System	Complaints	Portals	OCRMS
 Complaint Tracking	✗ No	✗ Limited	✓ Basic	✓ Real-Time
 Automated Routing	✗ No	✗ No	✗ Limited	✓ Yes
 Role-Based Access	✗ No	✗ No	✓ Partial	✓ Full
 Status Visibility	✗ No	✗ Limited	✓ Basic	✓ Detailed
 Notifications	✗ No	✓ Email Only	✓ Limited	✓ Real-Time
 Analytics Dashboard	✗ No	✗ No	✗ Limited	✓ Advanced
 Centralized Database	✗ No	✗ No	✓ Yes	✓ MongoDB
 Security (JWT)	✗ No	✗ No	✓ Partial	✓ Full
 Scalability	✗ Low	✗ Low	⚠ Moderate	✓ High

4. Fit Validation Summary :

Problem	Solution Provided	Fit?
 Complaint submitted to wrong department	 Complaint categorization and automated routing	✓ Yes
 Lack of complaint status visibility	 Real-time complaint tracking dashboard	✓ Yes
 Delayed complaint assignment	 Automated department allocation	✓ Yes
 Poor communication	 Chat and notification system	✓ Yes
 No centralized complaint records	 MongoDB complaint database	✓ Yes
 Lack of accountability	 Administrative dashboard and audit logs	✓ Yes
 Difficulty monitoring complaint trends	 Analytics and reporting dashboard	✓ Yes

Overall Assessment: ✓ Validated — All identified complaint management challenges have corresponding implemented solution features within OCRMS. The system successfully addresses the needs of both primary user groups (Citizens and Complaint Resolution Officers), confirming a strong Problem–Solution Fit.

5 . Overall Assessment

 VALIDATED

All identified complaint management challenges have corresponding implemented solution features within OCRMS.

The system successfully addresses the needs of both primary user groups (Citizens and Complaint Resolution Officers), confirming a strong Problem–Solution Fit.

6 .Conclusion

The Problem–Solution Fit analysis confirms that the Online Complaint Registration and Management System (OCRMS) effectively addresses the major challenges associated with traditional complaint handling processes. The identified problems—including lack of complaint visibility, delayed assignment, poor communication, absence of centralized records, and limited accountability—are directly resolved through the system's core features such as automated complaint routing, real-time status tracking, notification services, centralized database management, and administrative dashboards.
